DETAILED ACTION

Response to Arguments

The Response filed 18 August 2005 has the following effect.

The rejection of claims 1-6 under 35 U.S.C. 102(b) as being anticipated by Grant et al, is hereby expressly withdrawn.

The rejection of claims 10 and 11 under 35 U.S.C. 102(b) as being clearly anticipated by Jochmann et al, is hereby expressly withdrawn.

The following rejection is being maintained.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-13 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of copending Application No. 10/668,041, cited by applicants. Although the conflicting claims are not identical, they are not patentably distinct from each other because the

Art Unit: 1711

addition of the mineral oil is optional in instant claims 1-6. Addition of a polybutene is shown in the dependent claims of the copending application. All other parameters, including Gardner impact strength are embraced by the claims of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

The rejections of the claims over the references to Grant and Jochmann et al are expressly withdrawn.

No timely filed Terminal Disclaimer has been received in this Office to overcome the rejection of claims 1-13 under the judicially created doctrine of obviousness-type double patenting. As such, the rejection is being maintained.

The indication of prosecution on the merits being closed in accordance with *Ex parte Quayle* practice was inadvertent and not correct.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
